

Instructor First Aid Training

First aid instructors teach people skills such as cardiopulmonary resuscitation and first aid for poisoning, choking, and even burning. Instructors may teach both adults and children.

First Aid Instructor Training will help safety managers and rescue professionals and any employees to gain advanced knowledge and understanding of medical emergencies, first aid requirements as well as basic techniques that can save lives. Such online course helps first aid instructors to get aware of various critical conditions in medical emergencies and know about the first aid solution that can work effectively. This online first aid training for instructors helps them to learn about basic first aid requirements like bandages, CPR, and DRSABC for basic, critical, and emergency conditions like heart attack, bleeding, burns, strokes, shock, blood pressures, unconsciousness, heatstroke, animal bite, snake bites, etc.

Course Objectives:-

- Basic life support techniques that commonly taught to health care and rescue professionals
- Control bleeding and manage born injuries, electric shock, and any stroke
- CPR / DRSABC and Heart-Attack, diabetes mellitus
- Care for injuries and medical emergencies
- Advanced resuscitation techniques
