

B.E.M.S.

BACHELOR OF ELECTRO HOMOEOPATHY MEDICINE & SURGERY

The Bachelor of Electropathy Medicine and Surgery (BEMS) program is an undergraduate degree program that focuses on the understanding and application of electropathy medicine. This unique discipline combines elements of both electromagnetic therapy and traditional medicine to provide an alternative approach to healthcare.

The BEMS program aims to equip students with the knowledge and skills necessary to diagnose and treat various medical conditions using electropathy techniques. Students learn about the principles of electropathy, which involve using electrical currents and frequencies to stimulate the body's natural healing processes.
