

Advanced Stroke Life Support

The Advanced Stroke Life Support (ASLS) Course is designed to help in-hospital and prehospital healthcare professionals identify, evaluate and manage patients with stroke. The ASLS Instructor-led course teaches the importance of preventing cardiac arrest, high-performance teams, early and continuous high-quality CPR, systems of care, recognition and intervention of cardiopulmonary arrest, post-cardiac arrest care, acute dysrhythmias, stroke, and acute coronary syndromes (ACS).

Your ASLS training will give you a broader overview of several medical conditions that affect the heart and brain.

You will learn how to identify and treat several heart-related emergencies including heart attack, angina, congestive heart failure, anaphylaxis shock, and strokes.

Developed by experts in stroke, emergency medicine, prehospital care, and nursing education, the ASLS curriculum is now widely used by hundreds of hospitals, fire rescue, ambulance and EMS systems, and educational institutions throughout the country and around the globe. The course is also designed to meet the staff education requirements for the premier certifications for stroke systems of care from the Joint Commission's Advanced Certifications., anaphylaxis shock, and strokes.
